

Series 9

Moisture, Coat Weight, and Film/Layer Thickness

- Ultra-accurate measurements of moisture, coat weight, and film/layer thickness across a wide range of converting applications to tightly control processes
- Ultra-reliable operation without the need for recalibration, systematic monitoring or correction for drift
- A powerful feature set for preventative maintenance and maximum uptime
- Easy operation and maintenance enable manufacturers to realize immediate and long-term value over the lifetime of operation

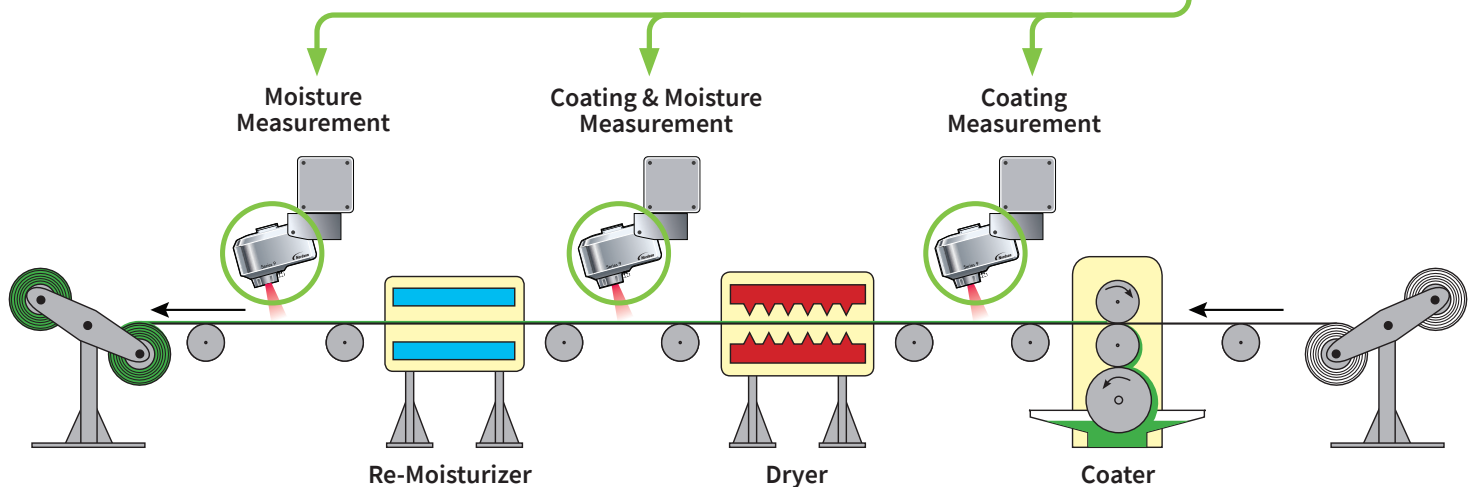

Infrared Backscatter Gauge

Ultra-Accurate Measurements Across a Wide Range of Converting Applications

Coating Measurement Capabilities

- Water or solvent-based
- Solventless
- Wax dip
- Impregnation
- Polymer extrusions
- Barrier coatings
- Resin coatings
- Hot melt
