

Nordson Automotive Dispense Nozzles

Optimized for specific bead and dot dispensing, Nordson automotive dispense nozzles provide long life with all materials while supplying visual indication to cell operators for correct use.

Advanced Features

- Attaches directly to any Auto-Flo® II or Anti-Drool dispense valve
- Compatible with vast amount of dispense materials in industry
- Made of robust, heat-treated steel to prolong time before changing nozzle
- Color coded by orifice size ensures nozzles are placed in correct cells and applications
- Can be used with break-away nozzle adapter to protect the nozzle, and the valve from damage during accidental robot crashes

Extruding Nozzles

- Provides smooth, full profile bead geometry
- Responsive to minute pressure changes
- Nozzle standoff equal to desired bead diameter
- Can be dispensed at harsh angles

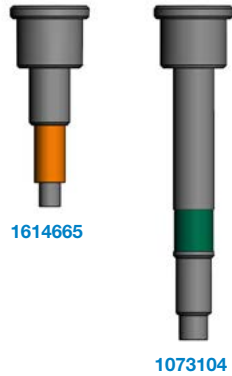

Streaming Nozzles

- Provides somewhat rough bead profile
- Designed to support greater standoff from part
- Allows variability within part standoff, making programming and fixturing less impactful

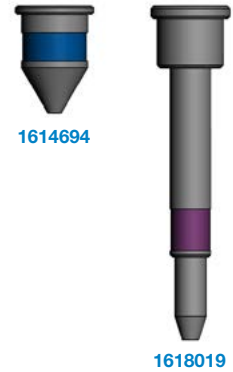

Nozzles with customizable lengths allow application flexibility
