

Dial-A-Dose Industrial Syringes

Single and multi deposit products for Fluid Packaging

Dial-A-Dose syringes allow users to select exact deposit amount.

Nordson EFD offers a comprehensive selection of disposable syringes used for packaging sealants and adhesives for dispensing applications in the electronics rework, industrial, dental, and do-it-yourself markets.

Dial-A-Dose® syringes are an ideal packaging system for controlled dispensing of adhesives and sealants. For multi deposit use, EFD Dial-A-Dose syringes offer an innovative, customizable solution to tailor deposits based on application and other requirements. The system's integrated ring allows users to "dial in" and dispense the correct deposit size, and then securely reseal the syringe until its next use.

Syringes are molded to safely package a range of fluids. They are available in 6cc to 100cc volumes.

Other one-piece plungers without the locking mechanism are also available. Ask your EFD application specialist for details.

Features

- Range of sizes and nozzles
- Self-venting barrels with "lead-in" aid for easy fill

Benefits

- Single and multi deposit syringes allow manufacturers to make the deposit, cap the syringe, and save for next deposit
- Locking ring ensures exact amount is dispensed
- Different nozzles to easily dispense any material viscosity for a range of industrial applications

Standard Multi-Dose Plungers

Choose a Dial-A-Dose plunger for measured multi-dose use. Sample plunger calibration marks shown below. Custom colors and calibrations available.

15cc Dial-A-Dose plunger

30cc Dial-A-Dose plunger

60cc Dial-A-Dose plunger

80cc Dial-A-Dose plunger

100cc Dial-A-Dose plunger

Standard One- and Two-Piece Plungers

Choose a one-piece or two-piece plunger when measured deposits aren't required. One-piece plungers feature integrally-molded seals, while two-piece plungers allow more flexibility for different fluids. Both styles retract easily to eliminate drip and drool, and maximize product use.
