The in-line Thermal Cure oven is ideal for mid-to-high volume production and is designed for easy integration with all Nordson ASYMTEK conformal coating systems. The CE-compliant oven features precise control of the conveyor speed and internal thermal environment. As an IR/convection oven, the infrared panels and exclusive heat dispersion plates transfer heat by convection.

The TC oven is equipped with a unique downdraft exhaust design. Plenums below the conveyor rails, and close to the coated substrate, efficiently remove volatile organic compounds (VOCs). This provides a safe operating environment when coupled to an external, customer-supplied exhaust system.

A touch-screen monitor makes it convenient to operate the Windows®-based user interface, which includes multi-language support, alarm log, event history, auto-diagnostics, help files, and the ability to store over 100 profiles. In addition, the TC oven comes with two of the most popular temperature profiling software tools in the industry (KIC and ECD).

The oven accommodates substrates that contain tall components on both the top and bottom sides. The SMEMA-compatible chain conveyor allows double-sided board processing, and can be easily integrated into existing conformal coating lines. The conveyor’s left-to-right workflow can be manually adjusted.

The TC oven’s easy-access design makes it possible to dismantle and replace heating elements and convection units in under five minutes.

**Features and Benefits**

- Flexibility is increased with four different lengths available to match your production requirements
- Unique downdraft exhaust design provides an efficient, safe path for VOC removal
- Control your process with individual heating zones that can be programmed for specific drying or curing profiles
- Increase productivity with a fast warm-up and cool-down
- Easy access to interior subassemblies aids preventive maintenance and cleaning
- CE-certified to ensure conformity to the safety and quality standards of the European Community
Thermal Cure (TC) Oven Specifications and Configurations

**Thermal Environment**
- Maximum process temperature: 500 °C
- Process profile repeatability: ±5%
- Heat-up time: 30 minutes (includes stabilization)

**Conveyor**
- Board width (1): 50-450 mm (2-17.7 in.)
- Board clearance (above and under): 100 mm (3.9 in.)
- Standard speed (2): 165-1100 mm/min. (6.5-43.3 in./min.)
- Pin/chain conveyor: 5 mm (0.2 in.)
- Conveyor height: 900-980 mm (35.4-38.6 in.)

**Other Standard Features**
- Portable computer control system, touch screen, Windows® operating system, KIC/ECD profiling software, 3-color light tower, SMEMA compatible, CE compliant

**Oven Configurations**
