

High Solid Spray (HSS) System

High solid spray system for coating applications

The fully assembled HSS High Solid Spray System includes dispense gun, cartridge, mixer with spray nozzle, and a regulator kit.

The HSS Spray System is an innovative dispensing system using EFD Side x Side cartridges for meter mix and spraying of two-component materials.

The system can be used for a variety of industrial spraying and dispensing solutions, including high solid coatings and adhesives. It's ideal for truck bedliners, pipe coating, manhole restoration, marine repair, roofing projects, and other maintenance and touch-up applications.

The complete HSS system includes a lightweight dispense gun equipped with handles and straps for extra portability and ease of use. A regulator on the gun's atomizing air line provides easy adjustment to accurately control air flow. Static mixer spray nozzles are available in a range of outlets and spray patterns.

Features

- Patented spray manifold/static mixer assembly
- Control of air flow, volume, and pressure
- Many mixer options available
- Reliable, lightweight, and portable design

Benefits

- Easy to adjust spray pattern for all jobs
- Complete material mixing and atomization
- Easy to switch out cartridges
- Flexibility to dispense different pigments
- Quick clean-up

The HSS Spray System is the perfect size for field applications.

The HSS Spray System easily sprays low-viscosity paints.
