

Syringes for Companion Animals

Single and multi-dose solutions for small animals

Dial-A-Dose syringes allow users to select exact dosing amount.

Dial-A-Dose features unique locking ring.

Available in single and multi-dose options.

Nordson EFD offers a comprehensive selection of dosing syringes used in the treatment of companion and other small animals.

Available in single or multi-dose options, EFD disposable animal health syringes are used to package medications, supplements, and a variety of other creams, gels, and pastes.

For multi-dose use, EFD Dial-A-Dose® syringes offer an innovative, customizable solution to tailor doses based on animal size, treatment schedule, and other requirements. The system's integrated ring allows users to "dial in" and administer the correct dose, and then securely reseal the syringe until its next use.

Other one-piece and two-piece plungers without the locking mechanism are also available. In addition, many EFD Do-It-Yourself (DIY) dual syringes can also be used for small animals. Ask your EFD application specialist for details.

Dial-A-Dose syringes safely package veterinary pharmaceuticals, nutritional supplements, and other animal products. They are available in 6cc to 100cc volumes.

Features

- Range of sizes and nozzles
- Self-venting barrels with "lead-in" aid for easy fill

Benefits

- Dial-A-Dose allows veterinarians or owners to dose the animal, cap the syringe, and save for next dose
- Locking ring ensures exact amount is dispensed
- Faster and easier to repeat dose than other syringes
- Different nozzles to easily dispense any material viscosity for oral and topical applications

	7660482	34cc	PE	White	7660207	7660452	—	7660436

Standard Multi-Dose Plungers

Choose a Dial-A-Dose plunger for measured multi-dose use. Sample plunger calibration marks shown below. Custom colors and calibrations available.

15cc Dial-A-Dose plunger

30cc Dial-A-Dose plunger

60cc Dial-A-Dose plunger

80cc Dial-A-Dose plunger

100cc Dial-A-Dose plunger

Standard One- and Two-Piece Plungers

Choose a one-piece or two-piece plunger when measured doses aren't required. One-piece plungers feature integrally-molded seals, while two-piece plungers allow more flexibility for different fluids. Both styles retract easily to eliminate drip and drool, and maximize product use.

One-piece plunger

Two-piece plunger
