

380mL Coaxial Cartridge

Available in 10:1 ratio only

Robust neck outlet prevents cracking.

The 380mL coaxial cartridge has a center tube that contains one material and an outer “doughnut” that contains a second material in a 10:1 ratio. The cartridge comes assembled with a valve that rotates to open and close, eliminating the need for a plug closure and retaining nut.

Features and Benefits

- Robust neck outlet prevents cracking
- Rotating valve opens and closes outlet
- Large valve bores for greater flow
- Molded valve seals ensure long, leak-free shelf life
- Partially used cartridges are easily re-sealed by closing the valve
- Pre-inserted pistons for ease of filling through the nose
- Cartridges are staked to retain pre-installed piston after filling
