

# Syringes for Bovine Applications

Single and multi-dose solutions for cows

Dial-A-Dose syringes allow users to select exact dosing amount.

Multiple nozzle options for bovine applications.

Available in single and multi-dose options.

Nordson EFD offers a comprehensive selection of dosing syringes used in the treatment of cows and other animals.

Available in single or multi-dose options, EFD disposable animal health syringes are used to package medications, supplements, and a variety of other bovine-related creams, gels, and pastes.

For multi-dose use, EFD Dial-A-Dose® syringes offer an innovative, customizable solution to tailor doses based on animal size, treatment schedule, and other requirements. The system's integrated ring allows users to "dial in" and administer the correct dose, and then securely reseal the syringe until its next use.

For mastitis intramammary treatments, select from four sizes. Each comes with the option of a breakaway cap for either full or partial insertion into the teat, making EFD syringes safer for the animal.

Other one-piece and two-piece plungers without the locking mechanism are also available.

Dial-A-Dose syringes safely package veterinary pharmaceuticals, nutritional supplements, and other bovine products. They are available in 6cc to 100cc volumes.

## Features

- Range of sizes and nozzles
- Self-venting barrels with "lead-in" aid for easy fill
- Special breakaway cap for safer mastitis treatments

## Benefits

- Dial-A-Dose allows veterinarians or owners to dose the cow, cap the syringe, and save for next dose
- Locking ring ensures exact amount is dispensed
- Faster and easier to repeat dose than other syringes
- Different nozzles to easily dispense any material viscosity for oral and topical applications

## Standard Multi-Dose Plungers

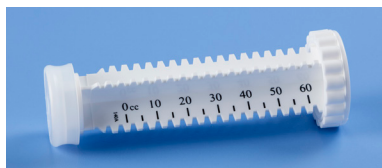

Choose a Dial-A-Dose for measured multi-dose use. Sample plunger calibration marks shown below. Custom colors and calibrations available.

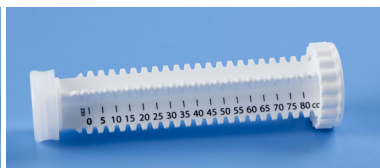

15cc Dial-A-Dose plunger

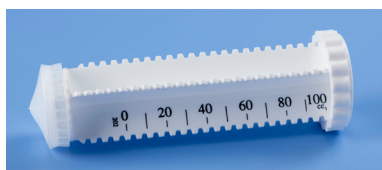

30cc Dial-A-Dose plunger

60cc Dial-A-Dose plunger

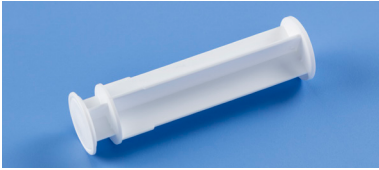

80cc Dial-A-Dose plunger

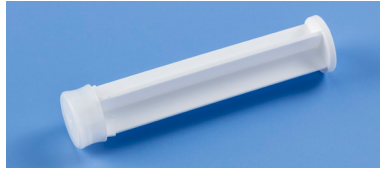

100cc Dial-A-Dose plunger

## Standard One- and Two-Piece Plungers

Choose a one-piece or two-piece plunger when measured doses aren't required. One-piece plungers feature integrally-molded seals, while two-piece plungers allow more flexibility for different fluids. Both styles retract easily to eliminate drip and drool, and maximize product use.

One-piece plunger

Two-piece plunger
