

# Model 64B Pump

**Versatile, air-operated, hydraulic pump for heated or unheated paint spray systems and other fluid delivery applications.**

## Features and Benefits

- **Self-adjusting, stationary, hydraulic packing glands** — need no maintenance throughout their life and cannot be overtightened or neglected.
- **Air-operated pump** — can be used in hazardous locations with solventborne coatings.
- **Reciprocating plunger and stationary packing design** — reduces pump wear and maintenance costs.
- **Wide selection of “standard” packing materials** — for use with a variety of coating formulations.
- **Precision-ground, long-life hydraulic plunger** — ensures long service life.
- **Large, stainless-steel ball checks** — provide smooth fluid delivery with high-viscosity coating materials.
- **Large, enclosed solvent chamber** — lubricates plunger and increases upper packing life.
- **Mechanical air valve** — provides reliable, fast cycling action to minimize pressure fluctuations for a more uniform spray pattern.
- **Sheet metal cover** — protects pump from the hazards of a normal industrial environment.

## Model 64B Pump

- **Positive-displacement, demand-type pump.**
- **Available in 15:1 fluid-to-air ratios.**
- **For use in airless and air-assisted airless applications**
- **Dual-acting, single-piston design.**
- **Self-adjusting, stationary packings.**
- **Circulating and non-circulating systems.**
- **Wall, drum or dolly mounting.**
- **Aluminum and stainless-steel models available.**

## Typical Applications

The versatile Model 64B pump is designed to operate multiple guns at mid-range volume or a single gun in high-volume applications of high-viscosity materials. Lower cycle rates of the 64B pump can easily accommodate abrasive coatings. The Model 64B pump is available in stainless-steel construction for corrosive materials.
