AF Air Free Pistons

The AF™ Air Free piston does a superior job of venting all of the air between the material and the piston. Its unique design easily eliminates trapped air. This piston does not require a shim to bleed the air nor does it require a second step to insert a center bleed plug. This piston bleeds air around the circumference of the black plug and closes when enough force has been generated when pressed against the adhesive.

When the AF Air Free piston is completely closed, the black center plug becomes flush with the top of the piston. Additionally, the AF piston is a PE/PBT combination and is compatible with most materials, simplifying the need for additional inventory.

Available for 50mL 1:1, 50mL large side off ratio, 200mL 1:1, and 300mL1:1 cartridges.

Benefits

- Eliminates trapped air
- No need for shims or secondary plugging operations
- Ensures on-ratio dispensing
- Fast, foolproof operation
- PE/PBT construction compatible with most adhesives & sealants

Part #	Description	Ratio	Size	Material
7704061	AF Piston	1:1	50mL	PE/PBT
7704307	AF Piston	1:1	200mL/300mL	PE/PBT
7704349	Large Side AF Piston	2:1, 4:1, 10:1	50mL	Nylon/PBT

Other 2K Piston Options

- Solid O-ring
- Solid multi-seal pistons
- Multi-seal pistons with a pre-staged center bleed plug which prevents trapped air when inserting the piston without using a shim

	Part #	Description	Ratio	Material
