

## Modular Quattro™ automatic spray gun provides fast color and coating changes in high-production airless painting applications.

Nordson Quattro automatic airless spray gun is designed for maximum reliability and easy maintenance

### Features and Benefits

#### Greater Color Change Capability

- **Up to four different colors** can be used with a single nozzle
- **Efficient, easy automatic color changing** without additional gun set-up.

#### Increased Transfer Efficiency

- **Fast cycling with positive cutoff** — provides precise operation with minimal dripping and spitting.
- **Nordson nozzles** — deliver effective atomization of hard-to-atomize coatings for minimal paint waste.
- **Optional Nordson heater** — reduces and controls material viscosity for improved operating performance and efficiency.

#### Increased Uptime

- **Modular design** — facilitates spray gun removal for fast cleaning and repair with minimal downtime.
- **Stainless steel construction** — ideal for waterbornes and highly corrosive materials.
- **PTFE coated packing cartridge** — resists material buildup on the shaft and spring.
- **Mounts to 1/2" round bar** — for fast, easy installation.

Nordson modular Quattro automatic airless spray guns are designed to deliver maximum reliability in high-production airless painting applications. Quattro guns produce fine atomization and a soft, controllable spray to deliver excellent finish quality with minimal overspray.

### Durable, Modular Design

The stainless-steel Nordson Quattro gun can be used for general finishing in either non-circulating or circulating heated airless applications, and is ideal for waterbornes and highly corrosive materials.

Its modular design allows for quick removal of the spray device, facilitating repair and maintenance with minimal downtime.

### Easy-to-use, Operate

The Quattro gun's ball tip and seat design ensures fast, clean on/off operation to eliminate dripping and spitting for reduced rejects, booth cleanup and material costs. Few moving parts ensure ease of installation and operation. The PTFE-coated packing cartridge resists material buildup on the shaft and spring, for easier maintenance and cleaning.

### Fast Easy Color Change

Quattro spray guns are ideal for instant color change in general finishing and drum painting applications. Four colors can be circulated through the fluid gun bodies, allowing only one color to be sprayed by actuating the respective air piston of the gun.

### Nordson Nozzles

The Nordson modular Quattro gun with proprietary Nordson nozzles provide improved atomization with a wide range of coating materials including high solids and other difficult-to-spray coatings.

# Quattro™ Automatic Airless Spray Guns

## Specifications

Quattro Airless Spray Gun		
<b>Dimensions:</b>	<b>Height</b>	3.25 in. (82.55 mm)
	<b>Length</b>	5.50 in. (139.70 mm)
	<b>Width</b>	5.875 in. (149.23 mm)
<b>Weight</b>		11.50 lb (5.22 kg)
<b>Air Requirements</b>		40-120 psi (2.75-8.27 bar)
<b>Maximum Fluid Pressure</b>		Standard 1700 psi (117 bar) With high pressure option kit 3000 psi (206 bar)

## Why choose Nordson

In highly competitive manufacturing markets, productivity is vital and performance is essential. That's why we apply both to everything we do, whether it's our products, expertise or outstanding customer service. We'll always be there to help maintain the new standards you've set, with expert service and support delivered through our teams working across the globe.

This unique Nordson approach helps you reach new levels of production, while working more accurately, efficiently and competitively than ever. Precisely why manufacturers who demand quality, can rely on Nordson.
